ABOUT ME

I'm Chandan K, a final-year Computer Science Engineering student passionate about building end-to-end web applications. My focus is on Java backend development paired with modern full-stack skills. Currently gaining real-world experience as a Java Full Stack Intern at Tap Edtech Pvt Ltd, where I'm building scalable applications that directly impact student workflows.

EDUCATION

Bachelor of Engineering in Computer Science December 2022 - June 2026

Dr Sri Sri Sri Shivakumar Mahaswamy College of Engineering, Nelamangala
Visvesvaraya Technological University, CGPA: 8.88/10.00

HSC, Class XII June 2020 - April 2022

Toppers Pre University College, Holenarasipur, Hassan, Karnataka, 83.2

SSC, Class X March 2019 - March 2020

Green Wood English School, Holenarasipur, Hassan, Karnataka, 78.24

SKILLS AND INTERESTS

Interests Interested in learning new technologies and developing innovative software solutions.
Enjoy solving logical problems and enhancing programming skills.

Design Software Currently pursuing Java Full Stack Web Development, gaining hands-on experience in frontend and backend technologies including HTML, CSS, JavaScript, and Java.
Applying MVC Design Pattern in Java-based web projects to effectively separate application logic, database interaction, and user interface layers.

Skills Java , JDBC , HTML , CSS , JavaScript , My SQL

PROJECTS

Project 1:Decentralized Online Voting System Link January 2025 - April 2025

A secure and transparent online voting platform that allows registered users to cast their votes digitally. The system ensures every vote is recorded accurately and cannot be manipulated, making the election process fair and trustworthy.

Tech Stack: HTML, CSS, JavaScript, Java, Spring Boot, MySQL. Key Features: User registration and secure login, admin panel to manage elections and candidates, one vote per user to prevent duplicates, real-time vote results, and JWT-based authentication for security.

Project 2: Mail Creator AI - Full-Stack AI Email Generator Link May 2026

Mail Creator AI – Full-Stack AI Email Generator Built a production-ready AI email generator using React, Tailwind CSS, Node.js, Express.js, PostgreSQL, Prisma, JWT, Groq AI API, Neon, and Vercel. Implemented secure authentication, AI-powered professional email generation, template library, dashboard, search/filter features, PDF export, Gmail compose support, and full-stack cloud deployment.

Tech Stack: React.js, Vite, Tailwind CSS, Node.js, Express.js, PostgreSQL, Prisma ORM, JWT, Groq AI API, Neon Database, Vercel

INTERNSHIP/TRAININGS

Java Full Stack Web Development Intern Feb 2026

Completed professional training and Gained practical knowledge in web development, database management, and problem-solving techniques.
